hello@adampatterson.ca

Senior PHP developer and web engineer with deep experience in Laravel, WordPress, and WooCommerce. Skilled at building scalable web applications, CMS integrations, and high-performing multi-site platforms. Brings a thoughtful approach to UX, analytics, and process optimization while collaborating with agencies, startups, and government clients.

Core Skills

Core Stack: PHP, Laravel, Filament, Livewire, Statamic, WordPress, WooCommerce, MySQL

Frontend & Styling: Tailwind, Bootstrap, SCSS, JS / React

Infrastructure & Tooling: Forge, AWS, DigitalOcean, LEMP, Git, CI/CD, Redis, Caching

Analytics & Search: Algolia, Segment, Amplitude, Mixpanel

AI & Automation: AI agents, MCP servers, prompt design, workflow automation

Professional Experience

Paper Leaf

Senior Web Developer / March 2022 – January 2026

- Led and contributed to large-scale web and application projects across tourism, public sector, and enterprise clients
- Integrated and extended CMS platforms (Statamic, WordPress) to support flexible content models and data governance
- Designed and maintained load-balanced infrastructure, background queue systems, and scheduled automation workflows

- Implemented fast, relevant search experiences using Algolia and integrated third-party data sources (Simpleview, Open Data)
- Led legacy system redevelopment and data migration efforts using progressive enhancement strategies
- Applied proven software design patterns to ensure scalability, reliability, and long-term maintainability
- Leveraged AI-assisted workflows and automation to improve development efficiency and internal tooling

Notable Work:

- True Blue
 - Led the redevelopment and data migration of a legacy, multi-instance WinForms application using Laravel, Filament PHP, and Livewire
 - Introduced a progressive enhancement approach to deliver immediate value while enabling continuous, iterative improvements
 - Collaborated closely with the client to refine business logic, streamline workflows, and modernize operational processes
 - Reduced manual effort and improved overall operational efficiency through thoughtful application design
 - Managed evolving project requirements while consistently delivering high-quality, maintainable solutions
- Tourism Calgary
 - Integrated Statamic CMS for flexible content management
 - Connected with Simpleview for tourism data synchronization
 - Utilized Calgary Open Data to enrich geographic data
 - Implemented Algolia for fast, relevant search experiences
 - Developed and managed a queue system for background processing
 - Applied software design patterns to ensure code flexibility, quality, and scalability
- The City of Beaumont
 - Enabled the City of Beaumont to migrate from a proprietary Civic CMS to WordPress
 - Created and implemented data governance practices to ensure data integrity and consistency

- Drastically improved page speed by making effective use of static caching.
- Integrated events calendar and sitewide search, including document indexing
- Developed sitewide notices with emergency alert functionality

BubbleUP Marketing

Senior Web Developer / December 2020 – March 2022

- Maintained and enhanced existing client web applications, integrating new features and improvements
- Built custom WordPress sites from scratch using Elementor and WooCommerce
- Applied modern development practices, including OOP, Composer, and build tools

Strathcom Media

Lead Developer / 2020 - 6 months

Lead Developer / 2016 - 6 months

- Streamlined a custom WordPress-based dealership CMS
- Improved developer onboarding by documenting and standardizing installation processes
- Evaluated and integrated third-party solutions for hosting, search, and server monitoring
- Implemented a caching strategy that reduced server load by ~50% and improved average load times from ~2,000ms to ~900ms

Go Auto - Corporate

Lead Developer / Front-End Developer / 2014 – August 2020

- Led development and maintenance of Go Auto's corporate, dealership, and marketing websites over 6+ years
- Managed a small team of 4, supporting 40+ Laravel and WordPress sites on optimized AWS infrastructure
- Designed a scalable Laravel-based architecture for rapid site creation
- Ensured high performance, stability, and brand consistency across OEM and internal guidelines
- Implemented customer deanonymization, event tracking, and analytics to support strategic marketing decisions
- Collaborated with growth and automation teams

- Architected a Docker-based deployment framework using a reverse proxy

ANVL Creative

Senior Front-End Developer / 2015 - Current - Contract / Part-time

- Developed successful hospitality industry websites for ANVL Creative
- Improved site performance and reduced hosting overhead
- Built fully editable, flexible WordPress and WooCommerce sites using a custom parent/child theme process.

Notable Projects:

- [Apex Predator Brewing](#)
- [Centreal Social Hall](#)
- [Century Hospitality Group](#)
- [Robert Spencer Hospitality](#)
- [Sorrentino's](#)
- [XIX Nineteen](#)

Early Career *Front-End & Design Roles (2007–2014)*

- Built application interfaces, CMS-driven websites, and responsive layouts for agencies and product teams
- Worked closely with clients to support delivery, usability, and long-term success

OpenSource and other Projects

- [Starter Template](#) - WordPress Starter Template
- [Axe](#) - WordPress Starter theme
- [WordPress OAuth - Composer Package](#)
- [Request PHP - Composer Package](#)
- [HTTP - Composer Package](#)
- [Numeral](#)

My Education

Northern Alberta Institute of Technology Multimedia Diploma 2001-2002

Victoria Composite High school Diploma 1997-2000
