hello@adampatterson.ca

Dear Hiring Manager,

My name is Adam Patterson.

I'm a senior web developer with over a decade of experience building, modernizing, and maintaining scalable web applications for agencies, established brands, startups, and government organizations. My background spans PHP, Laravel, WordPress, and modern frontend and infrastructure tooling, with a consistent focus on performance, maintainability, and delivering real business value.

Most recently at Paper Leaf, I worked on complex projects across the public sector, tourism, and enterprise clients. This included leading the redevelopment and data migration of a legacy multi-instance WinForms application using Laravel, Filament PHP, and Livewire, where I introduced a progressive enhancement approach that delivered immediate value while supporting continuous improvement. I also contributed to large-scale platforms such as Tourism Calgary, integrating CMS solutions, third-party data sources, advanced search, background processing, and load-balanced infrastructure to support reliability and growth.

Across my career, I've frequently operated at the intersection of development, architecture, and collaboration—working closely with designers, product teams, and clients to refine requirements, streamline workflows, and build systems that are both flexible and resilient. I'm particularly drawn to work that involves connecting systems, improving developer experience, and using data and analytics to inform better decisions.

I bring a thoughtful, pragmatic approach to development, balancing clean architecture and modern best practices with the realities of timelines, evolving requirements, and long-term ownership. Whether leading initiatives, mentoring teammates, or contributing as a senior individual contributor, I focus on building solutions that teams can confidently extend and maintain.

I'd welcome the opportunity to bring my experience to your team and contribute to building reliable, high-quality software that supports both users and the business. Thank you for your time and consideration.

Sincerely,

Adam Patterson
