Core Skills

Core Stack: PHP, Laravel, Filament, Livewire, Statamic, WordPress, WooCommerce

Frontend & Styling: Tailwind, Bootstrap, SCSS, JavaScript / React

Infrastructure & Tooling: AWS, DigitalOcean, System Integration, Git, CI/CD, Forge, LEMP, Redis, In-Memory and Static Caching, Queues and Automations, third-party system integration

Analytics & Search: Algolia, Segment, Amplitude, Mixpanel

AI & Automation: AI agents, MCP servers, prompt design, workflow automation

Teamwork: Cross-functional collaboration, Pair Programming, Mentoring newer developers

Professional Experience

Paper Leaf

Senior Web Developer | March 2022 - January 2026

- Led multiple projects as lead developer, providing technical strategy and leadership while mentoring developers, unblocking technical challenges, and ensuring team alignment

- Translated information architectures into structured schemas for CMS platforms, database designs, and API endpoints to support content consistency, findability, and data integrity
- Implemented fast, relevant search experiences using Algolia and integrated third-party data sources (Simpleview, Open Data)
- Designed and maintained load-balanced infrastructure, background queue systems, and scheduled automation workflows
- Led and contributed to large-scale web and application projects across tourism, public sector, and enterprise clients
- Increased development efficiency 10% by designing and implementing AI-assisted workflows
- Integrated and extended CMS platforms (Statamic, WordPress, and custom headless integrations using Laravel) to support flexible content models and data governance
- Enabled content governance through thoughtful creation of components, templates, and automated processes
- Mentored and supported junior developers through code reviews, technical guidance, and knowledge sharing
- Partnered closely with designers, project managers, and clients to translate business requirements into scalable technical solutions
- Provided technical strategy for hosting, system requirements, and infrastructure decisions across client projects
- Led legacy system redevelopment and data migration efforts using progressive enhancement strategies
- Applied proven software design patterns to ensure scalability, reliability, and long-term maintainability

Notable Work:

- True Blue
 - Led the redevelopment and data migration of a legacy, multi-instance WinForms application using Laravel, Filament, and Livewire
 - Introduced a progressive enhancement approach to deliver immediate value while enabling continuous, iterative improvements
 - Collaborated closely with the client in an agile process, using user feedback and testing to prove concepts early and establish a common language between technical and non-technical stakeholders
 - Saved dozens of human hours each month by modernizing legacy WinForms application flows using Laravel and Filament, effectively streamlining business logic and eliminating

manual workflows.

- Managed evolving project requirements while delivering high-quality, maintainable solutions
- [Tourism Calgary](#)
 - [Gold AVA Digital Award](#)
 - Leveraged Statamic CMS for flexible content management and predictable content style
 - Translated information architecture into structured schemas for use across the CMS
 - Indexed content for both internal site search and external findability through search engines and related content linking
 - Integrated Simpleview CRM, Implementing 15-minute synchronizations that replaced nightly batch updates
 - Used Calgary Open Data to enrich geospatial neighborhood data
 - Implemented Algolia search indexing 1,000+ listings, and multiple content collections, with complex taxonomies, achieving sub-100ms response times.
 - Developed and managed a queue system for background processing
 - Applied software design patterns to ensure code flexibility, quality, and scalability
- [The City of Beaumont](#)
 - Enabled the City of Beaumont to migrate from CivicPlus to WordPress
 - Defined data schemas and converted them into structured content within the CMS
 - Implemented repeatable content patterns to ensure data governance
 - More than doubled page speed by making effective use of static caching
 - Developed public and critical notices functionality
 - Indexed content and documents for both internal sitewide search and external findability, including document indexing
 - Integrated events calendar with ticketing

ANVL Creative

Senior Front-End Developer / 2015 - December 2025

- Built and maintained more than 15 high-traffic hospitality websites
- Improved performance and reduced hosting overhead by nearly 50%
- Developed flexible WordPress and WooCommerce sites using a custom parent/child theme system

Notable Work:

- [Apex Brewing](#)
- [Central Social Hall](#)
- [Century Hospitality Group](#)
- [Robert Spencer Hospitality](#)
- [Sorrentino's](#)
- [Yeg Cooking Classes](#)
- [XIX Nineteen](#)

BubbleUP Marketing

Senior Web Developer / December 2020 - March 2022

- Maintained and enhanced existing client web applications, integrating new features and improvements
- Built custom WordPress sites from scratch using Elementor and WooCommerce
- Applied modern development practices, including OOP, Composer, and build tools

Go Auto - Corporate

Lead Developer / Front-End Developer / 2014 - December 2020

(Includes leadership roles with Strathcom Media, a Go Auto subsidiary)

- Implemented a caching strategy that reduced server load by ~50% and improved average load times from ~2,000ms to ~900ms
- Led development and long-term maintenance of 40+ Laravel and WordPress sites across dealership and marketing platforms
- Managed and mentored a small development team while optimizing AWS-based infrastructure
- Designed a scalable Laravel architecture to support rapid site creation and reuse
- Architected Docker-based deployment workflows using a reverse proxy to improve environment consistency and release reliability
- Streamlined a custom WordPress-based dealership CMS to improve performance and long-term maintainability
- Created data structures and content patterns to ensure content consistency and governance across 40+ dealership and marketing sites
- Implemented a custom headless CMS through WordPress
- Implemented customer tracking, analytics, and event instrumentation to support data-driven marketing decisions
- Served as lead developer for Strathcom Media (Go Auto subsidiary), improving delivery consistency and technical quality across internal agency initiatives

- Improved developer onboarding by documenting and standardizing installation and setup processes
- Collaborated cross-functionally with growth and automation teams to translate requirements into stable, shippable technical work

Early Career *Front-End & Design Roles (2007-2014)*

- Built application interfaces, CMS-driven websites, and responsive layouts for agencies and product teams
 - Worked closely with clients to support delivery, usability, and long-term success
-

My Education

Northern Alberta Institute of Technology Multimedia Diploma 2001-2002
